SUMMARY

4th-year Computer Science student with knowledge of software development, networking, system administration, and troubleshooting. Skilled in Linux, Windows, programming, and modern IT tools. Seeking an internship to apply technical skills and gain practical experience.

EDUCATION

Bachelor of Engineering in Computer Science (2022 - Present) Institute of Technology of Cambodia

- **Current Status:** 4th Year of a 5-year engineering program.
- **Relevant Coursework:** Computer Networking, Operating Systems, Database Systems, Telecommunications Infrastructure, Full-Stack Development.
- **Availability Note:** flexible internship hours during studies and full-time after the semester ends.

TECHNICAL SKILLS

- **Networking:** IP Addressing, TCP/IP Protocols, DHCP, VLAN, Router & Switch Configuration.
- **System Administration:** OS (Window, Linux), User & Permission Management, SSH Configuration, Command Line (Linux/CLI).
- **Frontend Development:** HTML, CSS, JavaScript, TypeScript, Vue.js, React.js.
- **Mobile Development:** Flutter, Dart.
- **Backend Development:** Java, Node.js, Express.js.
- **Database Management:** MySQL, PostgreSQL, MongoDB.
- **Tools & Platforms:** GitHub, Docker, VMware, Cisco Packet Tracer, Vercel, VS Code.
- **Soft Skills:** Problem-Solving, Cross-functional Teamwork, Communication.
- **Languages:** Khmer (Native), English (B2), French (Elementary).

ACADEMIC AND PERSONAL PROJECT

- **Network Design & VLAN Setup (Cisco):** Configured VLANs and DHCP in a simulated Cisco environment to manage network segmentation and IP allocation.
- **Linux SSH File Management System:** Set up SSH access with user permissions, including individual folders, shared group folders, and a public shared directory.
- **Portfolio Website:** Designed and deployed a personal portfolio website to showcase skills and projects.
- **NearMe Social Web application:** Built a location-based web app to show nearby posts and activities.
- **Library Tracking System (Spring Boot):** Built a library management system with Spring Boot, REST APIs, and MySQL for tracking books and users.
- **E-Commerce Comic Store Web Application:** Built an online comic store with product catalog, cart system, and order management.
